## TRAILER GPS TRACKING

### HIGHLIGHTS

- 📍 SIMPLE INTERFACE
- 📍 REPORTING
- 📍 EASY INSTALLATION
- 📍 MAINTENANCE
- 📍 CUSTOMIZATION
- 📍 BATTERY BACKUP
- 📍 GEO FENCING
- 📍 TEMPERATURE MONITORING
- 📍 ALERTS
- 📍 SUPPORT

National Fleet Tracking believes that every company is unique. Due to this philosophy, we do not believe in a “one size fits all” solution. Instead, we get to know our customers to provide a custom solution that fits their needs. Our tracking technology gives your trailer visibility while in the yard, on the road, or at the docks, all while monitoring the temperature and g-force events.

# National Fleet Tracking

“The Eyes of the Road”

## Simple Interface

The FleetTrackPro platform is completely online and accessible from any platform. We take pride in the simple, user-friendly interface. Get location, temperature, and direction at a glance.

## Reporting

FleetTrackPro allows you to create custom reports that can be e-mailed to you on regular intervals for things such as maintenance, utilization, and even after hours reporting. Need to know detailed reporting on where a trailer traveled? No problem. It's all at the touch of your finger tips.

## Easy Installation

Our trailer tracking devices are simple to install even when a temperature sensor is included. This is a simple 2 step process. Usually done within 15-20 minutes. If you add the temperature sensor, it's a simple non-invasive procedure that will not damage the trailer.

## Maintenance

Preventative maintenance directly affects the longevity of your trailers. Empower your mechanics using FleetTrackPro reporting that can be printed or sent directly to their inbox. Then, sit back, relax, and let the system do the dirty work.

## Customization

Whether your trailers are reefers, flat beds, vans, or a combination, we create the right solution for your needs. All of our representatives are highly trained to help you get the best possible solution.

## Battery Backup

Our durable devices are not only climate proof, they also have a battery backup that allows them to report for up to 6 months when power is disconnected from the truck. When the unit is reconnected, the battery recharges.

## Geo Fencing

Geo-fences are virtual fences around property that administrators can create to receive instant alerts when the devices crosses into, or out of the geo-fence. These alerts are on-screen, text messages, and/or to e-mail.

## Temperature Monitoring

Our devices are constantly measuring the temperature and let you know when the temperature reaches any level outside of the threshold that you set. This helps you reduce claims and spoilage, guarantee the freshness of the product, and demonstrate the durability and reliability of your equipment.

## Alerts

Monitor your fleet of trailers in real time through our web based interface. Custom-set alerts help you identify, and solve potential issues very quickly. Each alert is unique and based on settings and parameters that you choose. Receive alerts for outside of temperature thresholds, geo fences, arrival, departure, maintenance, and more.

## Support

Our support team has over 20 years of experience in customer retention and satisfaction. We are here to help you install the devices, logging into the system, and using the entire trailer tracking system. We can show you how to manage users, manage your trailer grouping, setup Live Tracking links, and running the right reports.
